DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of claims 1-12 under 35 U.S.C. 103(a) as being unpatentable over Miller et al. (5,242,621) is maintained for the reasons set forth in the rejection mailed 1/3/2002.

The applicant argues that the use of glycols by the reference is disadvantageous, rendering the composition toxic. The applicant's claims do not require that the composition be glycol free. Furthermore, the reference does not require the antifreeze component to be a glycol. In the absence the reference requiring glycol be present and the claims requiring it not be present, it would have been obvious to create the instantly claimed heating or cooling fluid in view Miller, as the references teaches the use of a corrosion inhibitor which may contain a hydrocarbyl dicarboxylic, carbocyclic-substituted, alkanolic acids, other carboxylic acids or salts, triazoles or other materials useful in antifreeze or heat transfer fluids.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1751

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
